

## **10. CLINICAL TRAINING & CONTINUING MEDICAL EDUCATION :**

Through AUBMC and its associated medical entities, EMA provides observatory training opportunities for medical doctors and other health professionals in their respective specialties. These educational and training activities help maintaining and enhancing the knowledge and professional skills of healthcare practitioners in provision of care to patients and the public. Moreover, and through the AUBMC Medical Education Unit, EMA provides elective, residency and fellowship training opportunities at the different clinical departments at AUBMC, and encourages exchange of trainees between institutions. EMA works closely with the Continuing Medical Education team to facilitate the development of educational courses, workshops and conferences targeting physicians, nurses and other healthcare providers on the national and global levels.
